Zinnia, Royal Purple
Honorable Mention, 1942 All-America Selections

The deep rich reddish purple tones of this Royal Purple Zinnia are a

charming reminder of the soft velvet of regal robes. This brand-new shade in the Dahlia-flowered class is well named. The plants grow on the average $2\frac{1}{2}$ to 3 feet tall and are very uniform in habit. Its extralarge, double blossoms are about 4 inches in diameter and of excellent form. We believe this to be an outstanding addition to the Dahlia-flowered Zinnias.

IMPORTANT NOTICE REGARDING FLOWER SEEDS

The available supply of Flower Seeds for the coming season is short. The European War has made it practically impossible to import many varieties which American seedsmen depended on securing from foreign growers and also such other items as were not being produced in this country. On top of this California flower seed growers have been seriously handicapped in production because of long-continued rains last spring. We believe, therefore, it will be good business for you, Mr. Florist, to purchase at once such flower seed items as you may anticipate using during the next few months.

Michell's "Distinctive" Antirrhinums

Rustproof Antirrhinum · Snapdragon

We are glad to announce that, after years of intensive work in an attempt to produce a strain of rustproof Antirrhinums, success has finally been achieved. This strain has proved noteworthy under extensively wet outdoor conditions; they have stood the tests and are better than 75 per cent rustproof. For growing outdoors for cutting or bedding, they will prove excellent. Each plant produces from 15 to 18 spikes, which are nonlateral, with flower-heads 10 to 14 inches long. They are of vigorous growth, with broad, dark green foliage and are practically immune from rust.

New Rustproof Varieties

R. R. REVEILLE, MAJUS GRANDIFLORUM. New 1942. This gorgeous new Snapdragon grows to a height of 22 inches and has an upright base-branching habit, each plant producing from 6 to 10 huge spikes of flowers. The color is a deep luminous yellow, with the upper lip of each floret toning to a lighter lemon-yellow. The individual florets are unusually large and the plant is rust-resistant. \frac{1}{2}\trade \text{plc} \tau \frac{40c}{2}: \text{trade pkt. 75c.; }\frac{1}{2}\text{oz. \$1.50.}

This variety will prove equally good for outdoor cut-flowers as well as greenhouse forcing. 1/2 trade pkt. 60c.; trade pkt. \$1.00; 3 trade pkts. \$2.50; 1/160z. \$3.00.

Aster, Early Giant, Light Blue

Michell's Superb Asters

We wish to emphasize the fact that our Asters are grown for us by specialists, and nearly all varieties under our own supervision. **Michell's "Distinctive" Quality** is nowhere more prominent than with our Asters.

SPECIAL NOTE.—In growing Asters, old soil and flats should never be used the second time without thoroughly sterilizing, to avoid the numerous diseases to which Asters are so susceptible. Barnyard manure should never be employed as a fertilizer. We recommend the use of finely ground bonemeal. Asters should not be grown in the same location two years in succession.

Fusarium-Wilt Resistant Strains

These we believe to be practically immune to this disease. We feel sure that by using this seed many disappointments due to crop failures

will be eliminated.

LARGE ALLDOUBLE FLOWERING PETUNIAS

The latest development in Double Petunias is the new Alldouble strain which produces 100 per cent double flowers. We offer the following selected varieties in this strain and feel quite certain that they will prove a sensation with the florist trade, especially for pot-plants for Mother's and Decoration Day.

ALLDOUBLE, BRILLIANCY. New. The color of this new Alfdouble Petunia is a deep rich carmine-rose, several tones darker than Carmine Queen. ½ trade pkt. (500 seeds) \$1.50; trade pkt. (1000 seeds) \$2.75.

ALLDOUBLE BLUE BROCADE. Silver Medal, All-America Selections. New and rich color in Giant Fringed type. High percentage of fully double flowers of pleasing fragrance. The color is a true violetblue. Compact, stocky grower; free bloomer excellent for garden or pot-plants.

ALLDOUBLE APPLE BLOSSOM. Honorable Mention, All-America Selections. A beautiful apple-blossom-pink. Plants dwarf, 12 to 15 inches high, covered with large, double, fringed flowers.

ALLDOUBLE ORCHID BEAUTY. All-America Novelty. A decidedly new shade in the Alldouble Petunias. The habit of growth is dwarf and compact and flowers large and fully double. The color is a beautiful shade of orchid.

ALLDOUBLE GAIETY. Rose-red and white, beautifully frilled. A popular color combination.

ALLDOUBLE, AMARANTH-RED. Bright amaranth-red.

ALLDOUBLE, CARMINE QUEEN (World Beauty). An exceptionally fine dwarf type. Beautiful rosy carmine flowers which are very double. Other characteristics same as Victorious.

ALLDOUBLE, LOVELINESS. Extra dwarf. Identical in habit to the popular Carmine Queen, with the exception of the color, which is a clear La-France-pink. A valuable addition to this group.

ALLDOUBLE PURPLE.

ALLDOUBLE, WHITE QUEEN. Pure white, very double flowers.

MICHELL'S FORMULA ALLDOUBLE VICTORIOUS, MIXED.
Special mixture made up of named varieties.

Prices on the above Alldouble Varieties, except where noted: ½ trade pkt. (500 seeds) \$1.25; trade pkt. (1000 seeds) \$2.50.

DWARF ALLDOUBLE VICTORIOUS, MIXED. A choice strain. $\frac{1}{2}$ trade pkt. (500 seeds) \$1.25; trade pkt. (1000 seeds) \$2.50.

The following Double variety is a splendid strain producing an average of 60 to 70 per cent doubles.

NOTE. It is important not to discard the small seedlings, as these usually produce the best double flowers.

Double Fringed, Snowball. Pure white. 500 seeds \$1.00; 1000 seeds \$2.00.

Double Fringed, Mixed. Superbly colored flowers of mammoth size. 500 seeds 75c.; 1000 seeds \$1.50

Please note, Double Petunias are a highly bred type, and the seed is not as vigorous in growth as that of single strains. Seed of all our Double Petunias has been carefully tested in soil and the germination has been found to average 70 to 80 per cent. For this reason, and because of its high cost, we cannot entertain claims on nongermination of this seed, or requests for replacements. If carefully handled, we know the seed will grow.

Price should not be the prime consideration when buying Grass Seed. Low-quality seed may be the cause of endless trouble, in addition to setting the result of expensive labor and preparation at naught.

Our connections with the most reliable producers in this country and abroad place us in a position of advantage for our supplies, chiefly because of the large volume of Grass Seed for which we contract.

We are always pleased to submit samples, with prices, for comparison and let our customers be the judge.

Amaryllis (Ready in October) Giant American Hybrids

We believe our famous Giant American Hybrids to be the finest race of Amaryllis in cultivation. The enormous flowers are of fine form, and come in a great diversity of colors. They make fine pot-plants for store sales, and sell on sight when in bloom, at a good price. We offer mixed colors only. Doz., \$4.00; 100, \$30.00.

Fancy-Leaved Caladiums

We list only choice named and newer sorts, including Brazilian types. They cover a wide range of bright colorings and markings too difficult to describe. For summer store decoration or as pot-plants, we know of nothing finer. Start bulbs in damp moss with plenty of bottom heat and an occasional dampening. Do not allow them to get chilled, and at all times grow them in a warm, shaded place.

Montbretias, Giant-flowering Varieties

Montbretias resemble miniature gladiolus, are fine for cutting, and excellent for border planting. They prefer a light loamy soil, well enriched with leaf-mould, but no manure or chemical fertilizer should touch the roots; a little bonemeal and a light top-dressing of lime should prove beneficial. They will thrive either in partial shade or full sunlight, but

SUGGESTIONS IN CONNECTION WITH THE GROWING OF HARDY LILIES UNDER GLASS

Hardy Lilies should be grown cool and given 16 to 18 weeks from time of planting to bring them into bloom, so the best results can be obtained; in fact, if you can give them longer to come into flower it is better. Where they are forced with plenty of heat, the result is that you get good foliage with not so many early blooms.
